

Belts for the Automotive Industry

Knowing your production requirements

High production efficiency is very critical to the automotive industry.

Reliable conveying technology is part of achieving this important goal and this is exactly what makes our conveyor belt products a perfect fit. Through continual development and innovation of conveying belt technology, we have created many advantages for automotive conveying applications.

- Practically maintenance free which means minimum scheduled and unscheduled downtime
- No special tools or experts needed in case of maintenance activity
- Energy saving through low weight and positive drive technology
- Optimal operator ergonomics through grip surface and coloured belt edges
- Use of standard components minimises spare part stock and costs
- High versatility through modular setup allows for future modifications
- Proven low total cost of ownership

Ammeraal Beltech has supplied these reliable and proven conveyor belt components across all departments and at all automotive end users very successfully for more than 10 years.

The high level of customer satisfaction along with our frequent on-site inspections proves that uni plastic modular belts will meet or even exceed the challenging requirements of the automotive industry.

Body Shop, Paint Shop and Final Assembly

uni plastic modular belts are a perfect fit for conveyors throughout your production process, including skid conveying, manriders and cars on wheels.

Meeting all your belting needs ...

Product and Material Quality

Selecting the right products and materials to ensure a long lifetime without compromising requirements from the production process and company standards is very important.

Through years of experience in the automotive industry, Ammeraal Beltech has developed all the necessary materials to perfectly fit virtually every known requirement from the industry.

The variety of products Ammeraal Beltech is able to supply from their standard range includes:

- Various material (PP, POM, POX) and pin (PA, SS) combinations creating tensile strengths up to 100.000N/m
- Anti-static or electrically conductive properties along with electrically conductive sliding support
- Extra wear resistant materials to avoid heavy wear underneath wheels
- Flame retardant material
- Conveyor belt accessories such as Tyre Pushers and Buffer Trolleys
- Extremely strong and wear resistant bi-directional sprockets

Our Product Package

Every conveyor system needs a well-balanced combination of components to ensure optimal performance and long lifetime expectancy.

We will recommend the optimum belt, sprocket and sliding sheet combination to ensure maximum performance is obtained. This can include special wear resistant belt sections on heavy loaded areas.

In case of up- and/or downstream transfers our conveyor belts can be equipped with your choice of standard or customised tyre pushers for problem-free transfers between conveyors.

For all your belting needs

Ammeraal Beltech Modular is one of the world's leading manufacturers of plastic modular belts and chains for internal transport.

Ammeraal Beltech Modular offers a comprehensive program of chains in both steel and plastic, modular belts and conveyor accessories to a variety of industries like automotive, corrugated and food.

We grow through people and products.

... with regular and specialised belts

Global Support and Service

Ammeraal Beltech is one of the leading manufacturers of process and conveyor belts worldwide. Our organisation operates through a network of Ammeraal Beltech service centres in over 26 countries around the world, and we have product availability through partners in over 150 countries.

The Automotive industry is a high priority within Ammeraal Beltech and is therefore set as a focus segment. A select group of dedicated specialists coordinates and supports all automotive activities to ensure high quality solutions for our customers.

End User & OEM

It goes without saying that full support is given to both End users and OEMs around the world. Our specialists are available to listen to your challenges and ideas. During realisation, Ammeraal Beltech will support you in planning, engineering, installation and commissioning of conveyors.

The After Sales Service is ready to act immediately upon any emergency or complaint.

Our goal is a long-term cooperation, driven by the success of realised projects.

Global service network

Ammeraal Beltech is a global belting company and a true “One Stop Belt Shop”, able to provide components, services and solutions for processing and conveying products.

Ammeraal Beltech’s success is the control of the full value chain (development, manufacturing, fabrication, sales, distribution and service) in close cooperation with customers in a wide area of applications.

Many different conveying systems are used from pressing shop to final assembly and end of line testing. Ammeraal Beltech has a full product range to supply high quality products for these conveyors.

We supply Synthetic Belts in the pressing shop for secure transport of stamped sheets along with Engineered Belts for perfect timing and positioning.

Wide range of both standard and engineered products

For each and every process, Ammeraal Beltech representatives support you to make the best selection for your needs. When the process requires a special surface profile, a different material cover, vacuum channels, etc. Ammeraal Beltech has the ability to meet the requirement.

24/7 service

The supply of parts to the manufacturing process is frequently handled by conveyors. The usual “just in time” setup calls for reliable conveyor belts and minimised scheduled and unscheduled downtime. Ammeraal Beltech products and 24/7 service support help you to achieve this important demand.

Ammeraal Beltech product groups

- Synthetic process & conveyor Belts
- Rapplon® high performance flat Belts
- uni Plastic Modular Belts
- Endless Woven Belts
- Engineered Belts

Excellent service, advice and fabrication

- Ammeraal Beltech developed a wide range of belting and accessories to assist in improving production efficiency and minimise downtime.
- Skilled personnel are on call to repair and install belts using professional equipment.
- Most orders can be dispatched directly from stock.
